Computing: Year 2 We are Game Testers

In this unit you will:

- Find out how the addition game works.
- Find out how the fish game works
- Find out how the tennis game works.
- Find out how the duck shoot game works.
- Look at complex games
- Work out the rules in each other's games

I know that I need to limit the time I spend playing computer

I can see why it can be hard to stop playing computer games.

I know that some games are for older children.

I know to tell someone if I am worried about a computer game.

We are games testers

I can change the code for a computer game in Scratch to make it work better.

I can talk about what happens in a computer game.

I can find and understand the code for a computer game in Scratch.

I can see that a computer game works by following instructions.

I can predict what will happen in a computer

I can see how computer games are similar.

I can test a computer game.

Word Bank

algorithm
predict
rules
Scratch
test

Computing: Year 2 We are Photographers

In this unit you will:

- Look at photos and talk about what makes a good photo
- Learn about a camera.
- Take photos on your chosen theme
- Use a program to organise your photos
- Pick your best photos for the portfolio

I know how to let my teacher know if I am worried about an image.

I can give helpful feedback to my friends.

I know that there are some photos I shouldn't put on the web.

I can talk about how I took, edited and chose my best photos.

I can choose my best photos for our class collection.

We are
photographers

I can edit photos to make them look better.

I can take photos.

I can take photos that are in focus.
instructions.

I can decide if a photo is worth keeping.

I can take high quality photos.

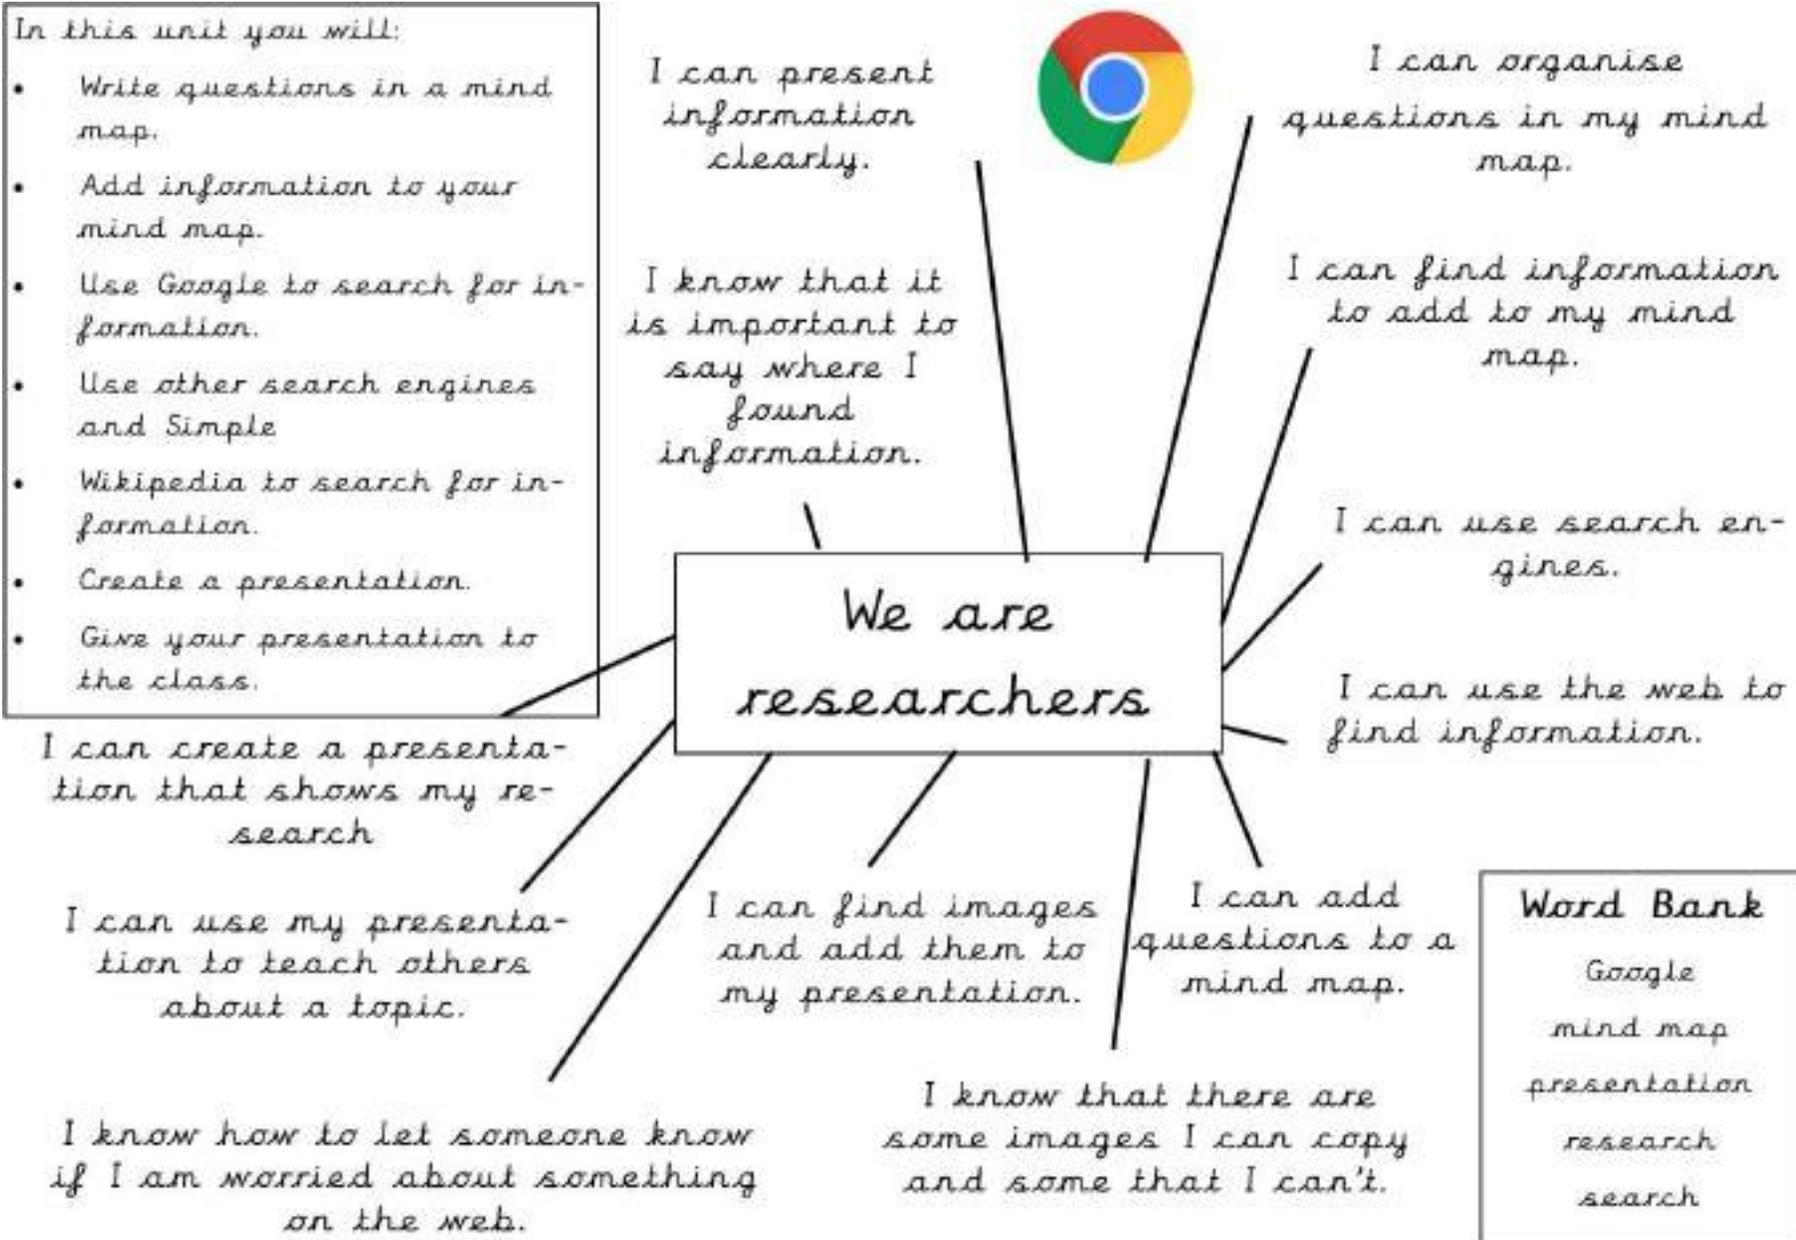

I can edit photos.

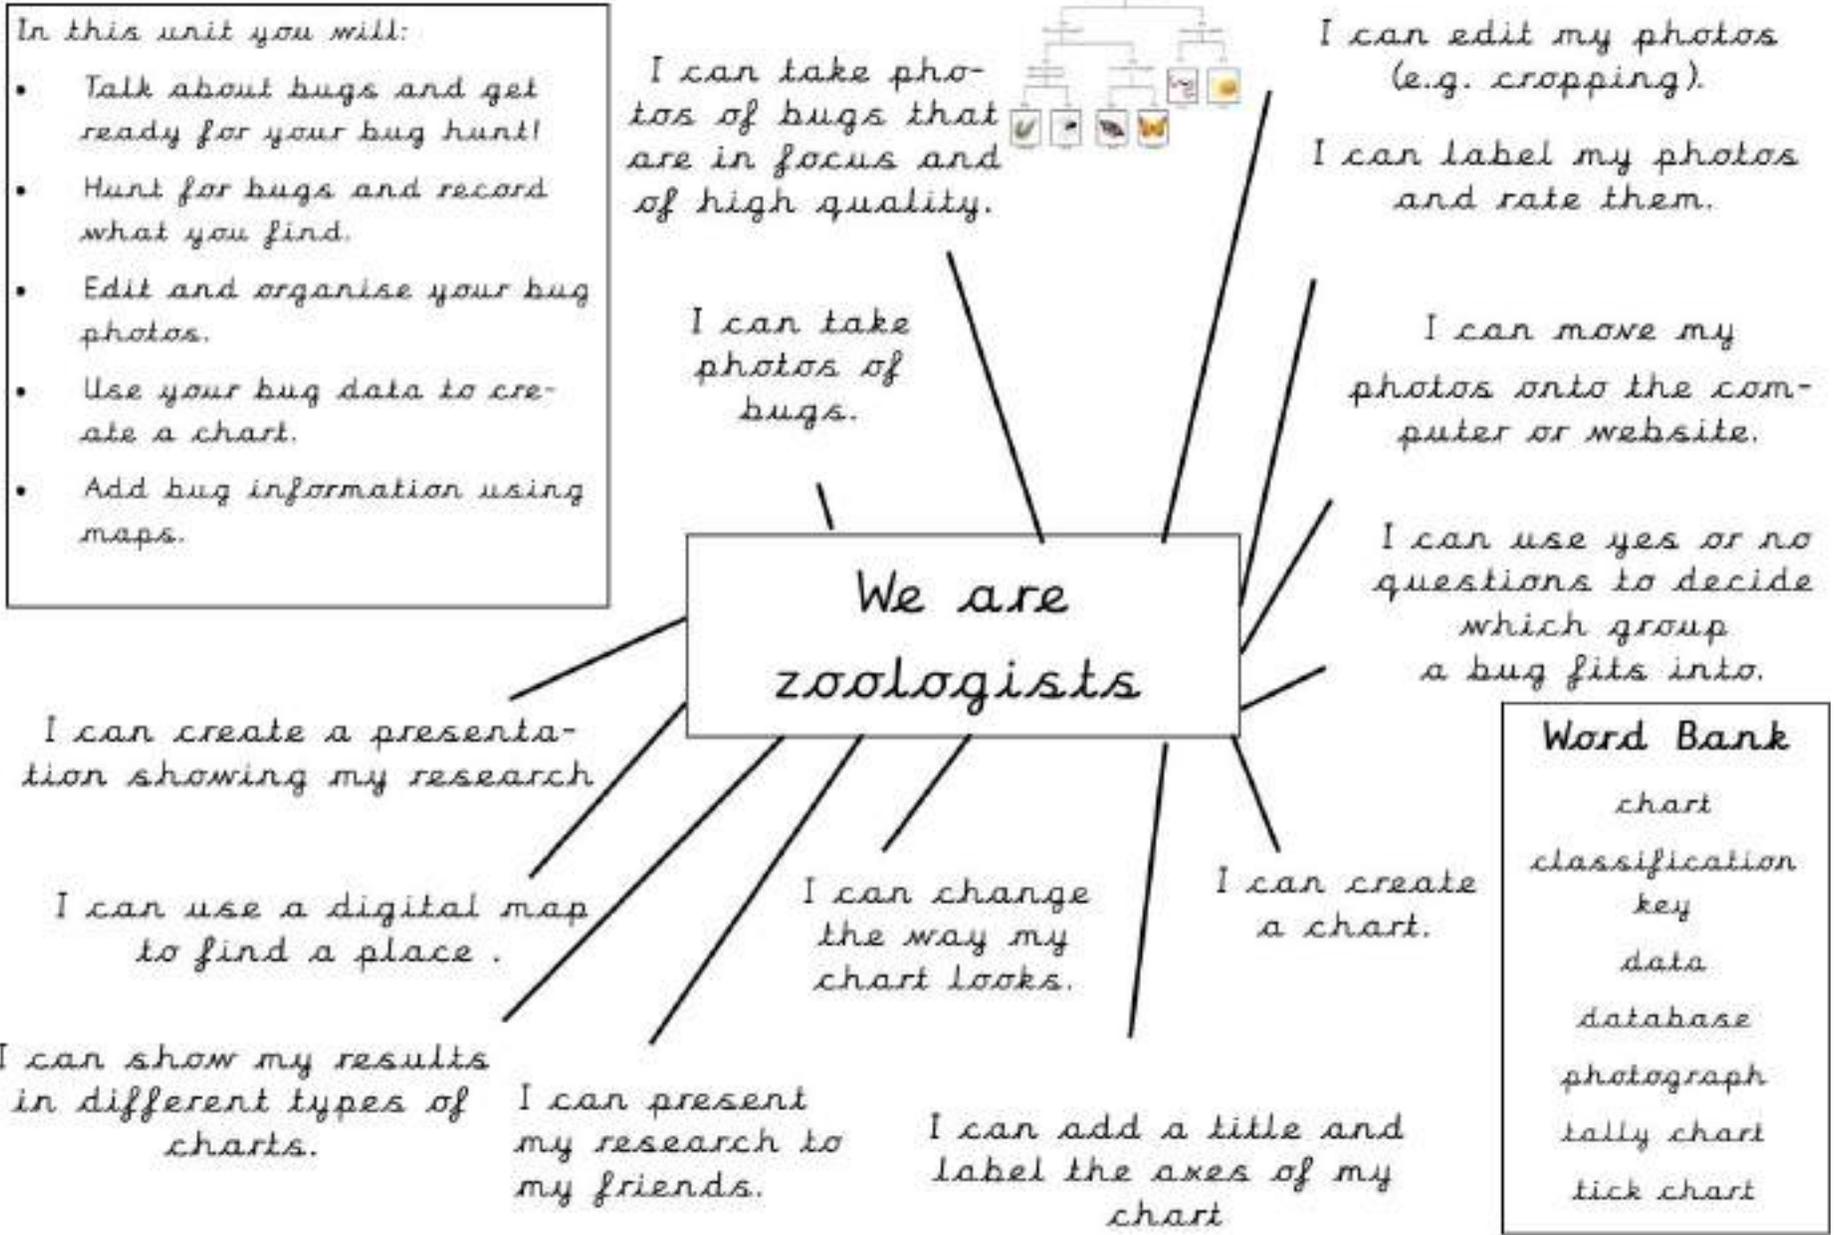

Word Bank

Computing: Year 2 We are Researchers

Computing: Year 2 We are Zoologists

Computing: Year 2 We are Astronauts

Computing: Year 2 We are Detectives

In this unit you will:

- Read and reply to an email.
- Work with email attachments.
- Write and send an email.
- Organise the fact file records.
- Set out your evidence in a class email.
- Review what you have learned about email safety.

I can read an email.

I can write and reply to an email.

I can read and understand the headers of an email.

I can check my email for mistakes before I send it.

I can see if an email and an attachment are from someone I know and trust.

I can see how an email address has two parts.

We are detectives

I can organise a spreadsheet so it shows me the information I need.

I can take notes from an email in writing or using an audio recorder.

I can see that the domain name in an email address gives important information.

I know what to do if I'm worried about opening an email.

I can create a spreadsheet.

I know how important it is to type an email address.

Computing: Year 3 Online Safety

Subject Specific Vocabulary

| | |
|------------------------|--|
| cyberbullying | the use of electronic communication to bully a person |
| communication | the act of giving, receiving, and sharing information |
| technology | the use of science in solving problems |
| advertisements | anything that draws good attention towards things |
| report | to give a written or spoken description of something |
| concern | a feeling of worry or care about a person or thing |
| email | a system for sending messages between computers |
| network | a system of computers and other devices (such as printers) that are connected to each other |
| respectful | interacting with people in a way that shows that you care about their well-being and how they feel. |
| responsible | doing the things you are expected to do and accepting the consequences (results) of your actions. |
| privacy setting | controls available on many social networking and other websites that allow users to limit who can access your profile and what information visitors can see. |

Sticky Knowledge about online safety

Cyberbullying can include:

- Sending/sharing nasty, hurtful or abusive messages or emails
- Humiliating others by posting/sharing embarrassing videos or images
- Spreading rumours or lies online
- Setting up fake online profiles
- Excluding others online
- Repeated harassment and threatening messages (cyberstalking)

You can help to stop cyberbullying.

- Get someone to help you report it
- Don't forward or share it
- Don't take part in it
- Leave the group or conversation
- Say something kind or positive to the person being cyberbullied
- If it's safe, take a stand against it and ask the bully to stop
- Let the bully know that what they're doing is NOT ok.

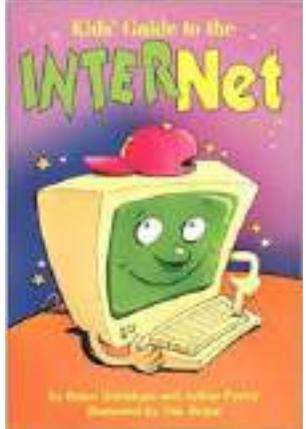

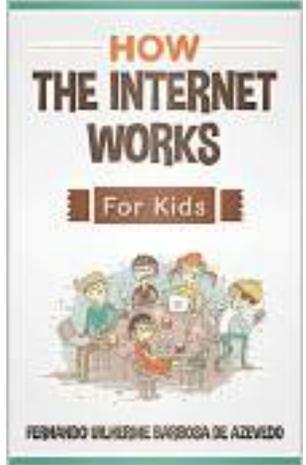

Exciting Books

More Sticky Knowledge

- It's NOT your fault
- There is help available

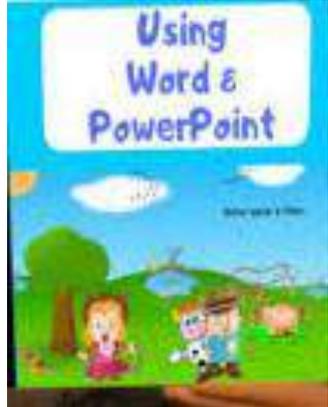

Computing: Year 3 Internet Research & Communication

| Subject Specific Vocabulary | | | Exciting Books |
|-----------------------------|--|--|--|
| communication | exchanging of information by speaking, writing or other mediums. |  <p>Positive use of internet makes our lives easy and simple ©Went2school</p> |  |
| search engine | a program that searches for items in a database that link to keywords specified by the user. | | |
| bookmark | The internet allows you to save shortcuts to your favourite webpages and navigate to them in seconds from any webpage. These can be found in a bookmarks bar along the top of your webpage. | | |
| digital footprint | Everyone leaves a digital footprint behind when they have been using the internet. Whenever you go online your computer is given a special number to identify it. This can be tracked to see what websites you have been visiting. |  |  |
| digital privacy | digital privacy is when you can use the internet and connected devices without compromising your information | Sticky Knowledge about internet research and communication | |
| word order | arranging your words in the order you think they would appear in the documents you're looking for | Different forms of online communication: a). email b). blogging c). video conferencing d). social networking | |

Computing: Year 3 Presentation Skills

| Subject Specific Vocabulary | |
|-----------------------------|--|
| hyperlink | an electronic link that allows a computer user to move directly from a marked place in a hypertext document to another in the same or a different document. |
| transition | A slide transition is the visual effect that occurs when you move from one slide to the next during a presentation. |
| branching story | some stories use a branching structure; you start at the beginning, are given several options, and those options lead to new choices, which each lead to new choices |
| animation | An animation effect is a special visual or sound effect added to a text or an object on a slide or chart |
| theme | A theme is a predefined set of colors, fonts, and visual effects that you apply to your slides |
| action settings | action buttons are built-in shapes you add to a presentation and set to link to another slide, play a sound, or perform a similar action. |
| audio file | a sound file |
| slide | A slide is a single page of a presentation |
| embed | an object, software, or hardware that is independent and does not need an external program or device to run it. |

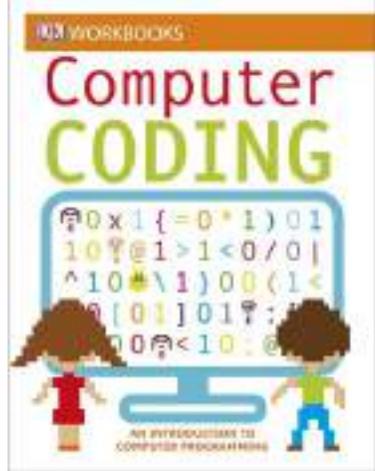

| Exciting Books |
|--|
|  |
|  |

Sticky Knowledge about presentation skills

Computing: Year 3 Programming

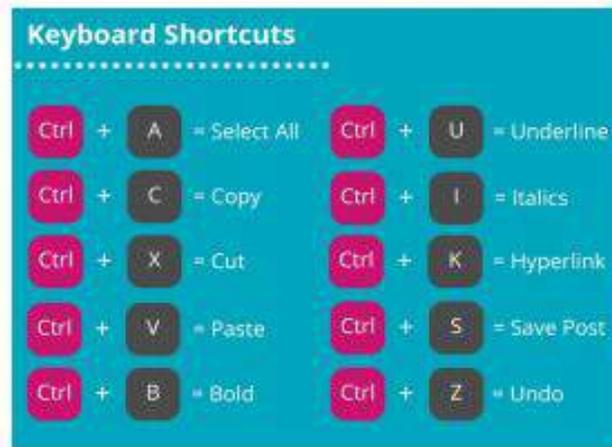

| Subject Specific Vocabulary | |  | Exciting Books |
|-----------------------------|--|--|----------------|
| debug | to eliminate errors in or malfunctions in computer program | | |
| algorithm | an algorithm is a fancy to-do list for a computer. Algorithms take in zero or more inputs and give back one or more outputs | | |
| rotate | to turn about an axis or a centre. | | |
| repeat | the act of happening or being done again. | | |
| penup | The Pen Up block is a Pen block and a stack block. If a sprite is currently using the pen because of the Pen Down block, the block will cause the sprite to stop drawing a trail | | |
| pendown | The Pen Down block is a Pen block and a stack block. The block will make its sprite continuously pen a trail wherever it moves, until the Pen Up block is used | | |
| regular polygon | A polygon is regular when all angles are equal and all sides are equal | | |
| pattern | repeated design or recurring sequence | | |
| Turtle Logo | a simple guide to computer programming |  | |

Computing: Year 3 Word Processing

| Subject Specific Vocabulary | |
|-----------------------------|---|
| word processing | word processing involves the use of computers, software, and printers to get data into printed form |
| font | a font or fount is all the letters or characters of a single size of a typeface |
| colour | colour is the aspect of things that is caused by differing qualities of light being reflected or emitted by them. |
| insert | to put in |
| hyperlink | an electronic link that allows a computer user to move directly from a marked place in a hypertext document to another in the same or a different document. |
| format | to organize or arrange in a certain way |

Keyboard Shortcuts

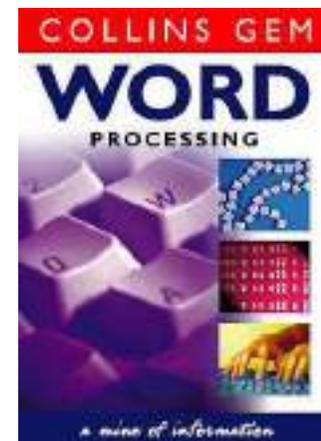

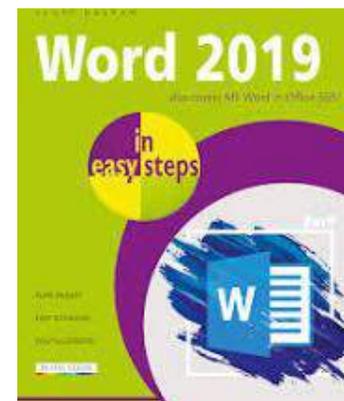

A keyboard shortcut is a combination of keys that allows the user quick access to a particular function.

Sticky Knowledge about internet research and communication

MS Word is a word-processing program used for creating documents such as letters, brochures, learning activities, job applications and students' homework assignments.

Exciting Books

Computing: Year 4 Scratch Quizzes

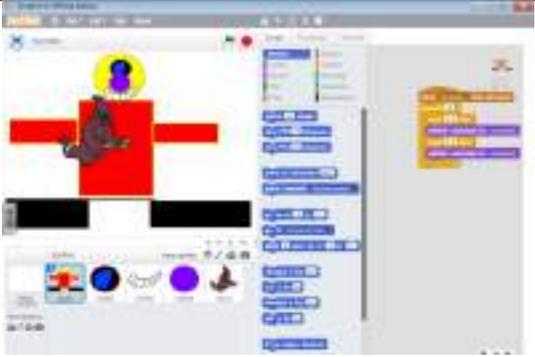

| Subject Specific Vocabulary | | |
|-----------------------------|--|--|
| Input | Something you do to the computer, e.g. type something in or move/ click the mouse. | |
| Output | Something the computer does on the screen or a sound it makes. | |
| Sprite | An animated element of the program. | |
| Ask | The computer asks a question and waits for an answer. | <p style="text-align: center;">Sticky Knowledge about Scratch- Quizzes</p> <ul style="list-style-type: none"> <input type="checkbox"/> You can use "Pick Random," to make the computer ask a different question each time. <input type="checkbox"/> Using If Else you can get the computer to tell you if you are right or wrong. <input type="checkbox"/> If you use a variable for your score you can make it go up or down when you get things right or wrong. <input type="checkbox"/> Using repeat you can put a set number of questions into your quiz. <input type="checkbox"/> Using different costumes you can make your sprite look happy when you get a question right. |
| If Else | The computer will perform one action if it receives a certain input and another if it doesn't. | |
| Say | The computer will show a speech bubble saying the message. | |
| Switch Costume | The computer will show a different costume for your sprite. | |
| Variable | A number you can use in the program. | |
| Set | You can set a variable to a specific number or a random one. | |
| Play Sound | The computer will play a sound. | |
| Join | This can be used to put more than one action into a single box. | |
| Pick Random | The computer will choose a random number. | |
| Repeat | The computer will repeat a set of actions. | |

Computing: Year 4 Garage Band

| Subject Specific Vocabulary | | |
|-----------------------------|--|---|
| My Songs | The place where your musical tracks are stored. |  |
| Tracks | The different instruments or sounds you can use to compose your music. Several tracks can be put together. | |
| Autoplay | A choice of rhythms you can use to easily make a tune. | |
| Mixer | The place where you can put different instruments together. | <p>Sticky Knowledge about Scratch- Garage Band</p> <ul style="list-style-type: none"> <input type="checkbox"/> Keep things simple and loop them. It will sound much better. <input type="checkbox"/> The drummer is the best way of achieving a steady beat. <input type="checkbox"/> Don't start all the instruments at the same time. Introduce them gradually. <input type="checkbox"/> Adjusting the volume of individual instruments can make things sound much better. |
| Loop | Play the track over and over again. | |
| Copy/ Paste | Use the same track again in another part of your music. | |
| Audio Recorder | You can record your voice onto a track. | |
| | | |

Computing: Year 4 Designing a Scratch toy

| Subject Specific Vocabulary | | |
|---------------------------------|--|---|
| Input | Telling the computer to do something with the keyboard or mouse. |  |
| Output | The computer shows something on the screen or makes a sound. | |
| When (space) Key pressed | The computer waits for a button to be pressed. | <p>Sticky Knowledge about Scratch- Designing a Toy</p> |
| Switch Costume | The sprite shows a different costume. | |
| Play Sound | The sprite plays a sound. | The "When (space) Key Pressed," command simulates a button being pressed on the toy. |
| If () Then | When an event happens the sprite will perform an action. | "Switch costume," will look like part of the toy is moving. |
| Touching ()? | The computer senses if the mouse or another sprite touches the sprite. | You can make your toy make a sound just like it would in real life. |
| Move () Steps | Tell the sprite to move a set number of places across the screen. | <p>By moving another sprite around the screen you can make your toy react to being hit by an object. You could make your toy sneeze if a flower touches its nose.</p> |
| Turn () degrees | Turn the sprite around. | |
| Forever | Repeat the action forever. | |

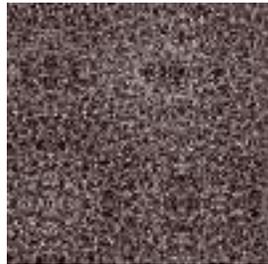

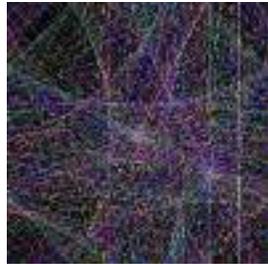

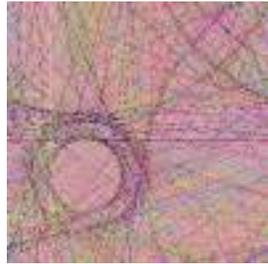

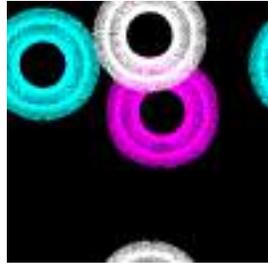

Computing: Year 5 Computer Art

We Are Artists: Using MS LOGO to create geometric art

Using Computers Independently select, use and combine a variety of software to design and create content for a given audience.

E-Safety Understand the need to only select age appropriate content

Coding Design, input and test an increasingly complex set of instructions to a program or device.

| Logo basic commands | Short-cut | Meaning |
|---------------------|---------------|--|
| forward x | fd x | Move the onscreen turtle forward x steps |
| back x | bk x | Move the turtle back x steps |
| left x | lt x | Turn x degrees |
| right x | rt x | Turn x degrees |
| penup | pu | Pen up |
| pendown | pd | Pen down |
| home | home | Return turtle to start point |
| clearscreen | cs | Clear the screen |
| hideturtle | ht | Hide the onscreen turtle |
| showturtle | st | Show the onscreen turtle |
| repeat x [] | repeat | Repeats bracketed commands x times |

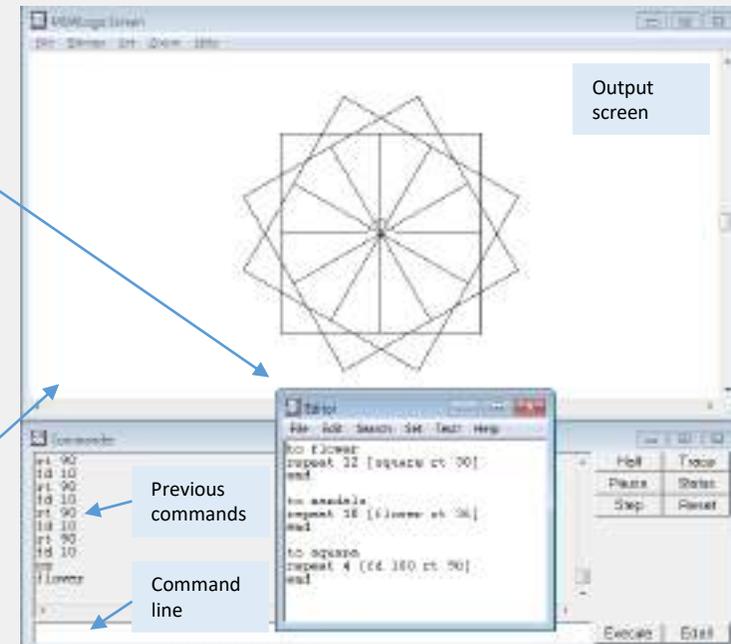

| Vocabulary | Definition |
|---------------------|---|
| algorithm | a set of instructions that will achieve a task |
| coding | putting commands into a program (to make an algorithm) |
| debug | checking and changing computer code to ensure that it works |
| turtle | a small floor robot or onscreen pointer that can be moved with commands |
| commands | the instructions that tell the computer what to do |
| command line | the space to enter and execute commands one by one* |

Edall

*For advanced programmers, Edall is Logo's built-in editor.

It allows you to preload **algorithms** which can then be executed with a single word.

The output screen shows the result of the **flower** command.

Computing: Year 5 Cryptography

We Are Cryptanalysts: Using computers to crack codes and ciphers

Using Computers Independently select, use and combine a variety of software to design and create content for a given audience.

E-Safety Understand the need to only select age appropriate content

Coding Design, input and test an increasingly complex set of instructions to a program or device.

| Coding system | Explanation |
|-----------------------|--|
| Morse code | Alphabet system for electronic transmission (not really code) |
| Semaphore | Alphabet system using flags |
| Secret writing | Writing using some form of invisible ink |
| Mirror writing | System for reversing letters that can be easily read in a mirror |
| Caesar cipher | Substitution cipher using letters of alphabet "shifted" by from 1 to 25 places |
| Monoalphabetic cipher | Alphabetic substitution cipher (alphabet might be randomised) |
| Pigpen cipher | A geometric simple substitution cipher |

| Rules for password security | |
|-----------------------------|---|
| Weak passwords | Short; easy to guess; single words; well known sequences (12345); shared with others; used in different systems |
| Strong passwords | Long; hard to guess; unique; kept secret and safe, not shared |

| Vocabulary | Definition |
|---------------------------|---|
| algorithm | a set of instructions (for encrypting a message) |
| code | a system for disguising messages by substituting words |
| encode | disguising a message by substituting words |
| decode | reading the disguised message by finding the original words |
| cipher | a system for disguising messages by substituting letters |
| encipher | to change a message from plaintext to ciphertext |
| decipher | to change a message from ciphertext to plaintext |
| plaintext | the message before encryption |
| ciphertext | the message after encryption |
| cryptography | the science of concealing the meaning of a message |
| cryptanalysis | the science of deducing a message's meaning without the key |
| encrypt | to encipher or encode |
| decrypt | to decipher or decode |
| key | the word or phrase used during encryption |
| frequency analysis | counting the distribution of letters in order to work out which letters correspond to the plaintext alphabet |
| steganography | a system for hiding the existence of a message |
| Internet security | the systems for keeping data and transactions private and safe on the World Wide Web (this often involves encryption using massive prime numbers) |

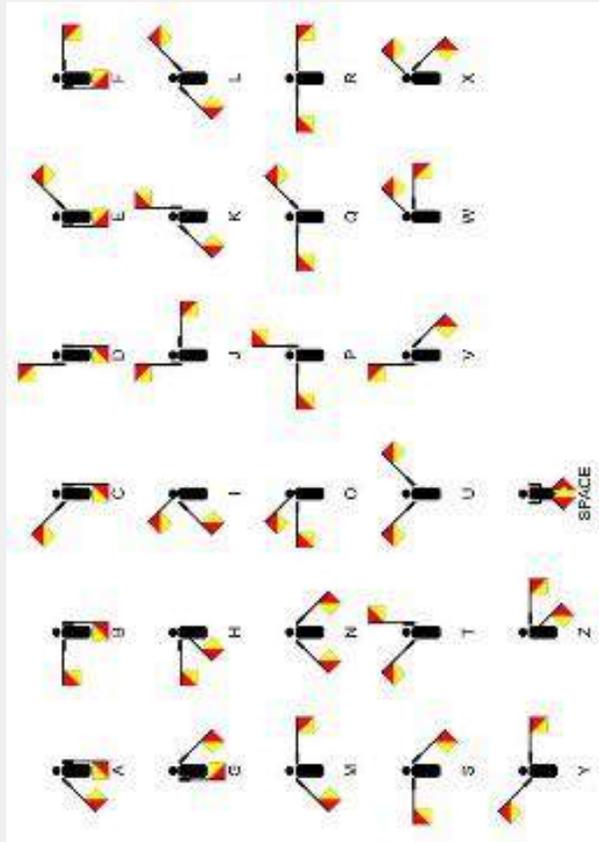

Computing: Year 5 Cryptography

We Are Cryptanalysts: Using computers to crack codes and ciphers

Using Computers Independently select, use and combine a variety of software to design and create content for a given audience.

E-Safety Understand the need to only select age appropriate content

Coding Design, input and test an increasingly complex set of instructions to a program or device.

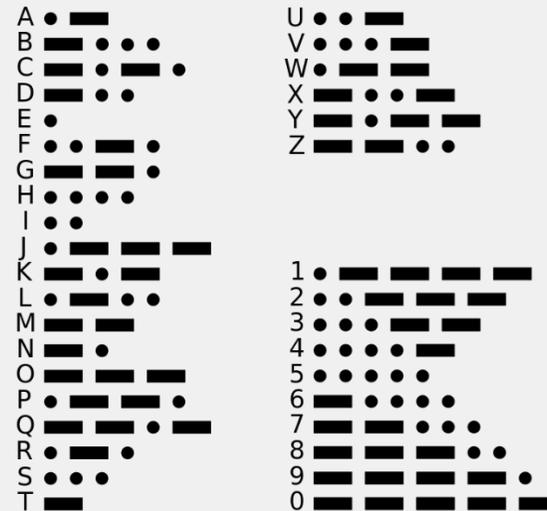

Semaphore flags

Wikipedia Commons
http://commons.wikimedia.org/wiki/File:Semaphore_Alpha.svg
Author: Denelson83

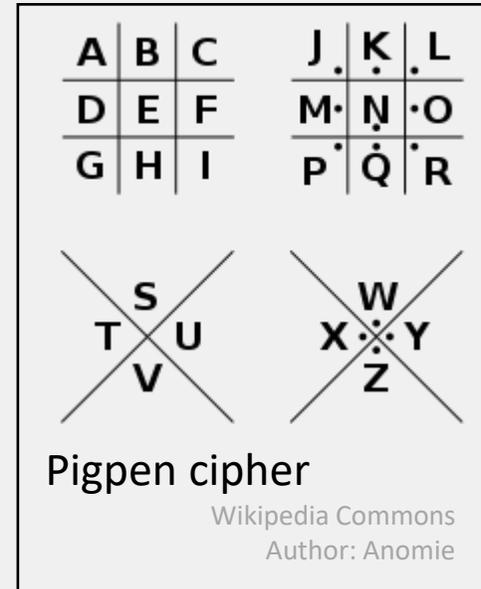

International Morse Code

1. The length of a dot is one unit.
2. A dash is three units.
3. The space between parts of the same letter is one unit.
4. The space between letters is three units.
5. The space between words is seven units.

Morse code

Wikipedia Commons
Author: Rhey T. Snodgrass & Victor F. Camp, 1922

Pigpen cipher

Wikipedia Commons
Author: Anomie

and so on...

Caesar cipher

Invisible ink

Can you read the message?

Pupils should be aware of these types of codes and ciphers; they don't need to learn Morse Code or semaphore letters individually!

Computing: Year 5 e-Safety

We Are Web Developers: Creating an e-safety resource

Using Computers Independently select, use and combine a variety of software to design and create content for a given audience.

E-Safety Understand the need to only select age appropriate content.

Coding Design, input and test an increasingly complex set of instructions to a program or device.

Digital content
common types of digital content include:

Text
Text

Images

Audio

Movies

Data

Software / games

S – SAFE (keep data and yourself safe)
M – MEETING (don't meet strangers)
A – ACCEPTING (don't trust files from unknown people)
R – RELIABLE (cross-check information sources)
T – TELL (tell a trusted adult if worried)

Some Internet safety organisations

| Vocabulary | Definition |
|------------------------------|---|
| e-safety | AKA Internet safety or cyber safety or online safety – keeping oneself and others free from dangers when using digital technology |
| conduct | your own behaviour with regard to e-safety |
| contact | being able to interact safely with others in the digital world |
| content | the things that you see and hear when you go on the internet |
| www | world wide web – the operating system for the internet |
| internet | a network of computers and other devices linked across the world |
| safe | keeping away from dangers on the internet or in using technology |
| responsible | being in charge of making the right choices for yourself |
| respect | treating others as you would hope to be treated yourself with fairness |
| acceptable use | use of digital resources that keeps you and others safe |
| unacceptable use | use of digital resources that could put you or others in danger |
| cyberbullying | the use of digital technology to bully a person |
| digital footprint | the information left behind by a person's internet activity |
| illegal file sharing | the distribution of certain digital data (usually over the Internet) without a licence which is against the law |
| intellectual property | property that has been created and belongs to the maker(s) |
| data protection | legal control over the access to and use of data stored on computers |
| age appropriate | suitable for a specific age or age range |

Computing: Year 6 We Are App Planners

| Subject Specific Vocabulary | |
|-----------------------------|---|
| APP | An application, downloaded by a user, to a mobile device |
| Geotag | an electronic tag that assigns a geographical location to a photograph or video, a posting on a social media website, etc. |
| GPS | A Global Positioning System, which is a radio navigation system that allows land, sea, and airborne users to determine their exact location, speed, and time, 24 hours a day, in all weather conditions, anywhere in the world. |
| Input | Something that is put in, taken in, or operated on by any process or system. |
| Output | A place where power or information leaves a system. |
| Research | The process you take to find out about a topic or subject. |
| Smartphone | A mobile phone that performs many of the functions of a computer, typically having a touchscreen interface, Internet access, and an operating system capable of running downloaded apps. |
| Pitch | A presentation to an audience to try and persuade them into an idea or item. |

| E-Safety |
|--|
| <p>Top 5 tips for keeping safe online:</p> <ol style="list-style-type: none"> 1. Be careful what you share. Once something is online, it's out of your control. If you don't want your parents or teachers to see it, don't post it. 2. Don't meet people you don't know in person. Even if you get on with them online, you never know who they really are. 3. Use a complex password. It should be hard for other people to guess your password and it's a good idea to change it regularly. 4. Check your privacy settings. Check who can see what you post and whether your accounts are public or private. 5. Talk about it. If you see something online that makes you upset or uncomfortable, talk to an adult you trust. |

| Key Knowledge |
|--|
| <ul style="list-style-type: none"> Smartphones and tables connect to the internet through the phone network, as well as having Wi-Fi capabilities. Smartphones and tablets use web browsers and email clients to access some of the services the internet provides, and therefore, offer opportunities for communication and collaboration (working together). |

Computing: Year 6 Spreadsheets

Key Learning

- To use a spreadsheet to investigate the probability of the results of throwing many dice.
- Using the formula wizard to add a formula to a cell to automatically make a calculation in that cell.
- To create graphs showing the data collected.
- To type in a formula for a cell to automatically make a calculation in that cell.
- Using a spreadsheet to create computational models and answer questions.

Key Resources

Key Vocabulary

Average – Symbols used to represent comparing two values

Advance mode – A mode of 2Calculate in which the cells have references and can include formulae.

Copy and Paste – A way to copy information from the screen into the computer's memory and paste it elsewhere without re-typing.

Columns – Vertical reference points for the cells in a spreadsheet.

Cells – An individual section of a spreadsheet grid. It contains data or calculations.

Charts – Use this button to create a variety of graph types for the data in the spreadsheet.

Count (how many) tool – Counts the number of whatever value object is in the cell to its immediate left and puts the answer in the cell to its immediate right.

Dice – When clicked, this will simulate a dice roll by switching to one of the faces of a die.

Equals tool – tests whether the entered calculation in the cells to the left of the tool has the correct answer in the cell to the right of the tool.

Formula – Use the formula wizard or type into the formula bar to create a formula in a cell, this will calculate the value for the cells based upon the value of other cells in the spreadsheet.

Formula Wizard – The wizard guides you in creating a variety of formulae for a cell such as calculations, totals, averages, minimum and maximum for the selected cells.

Move cell tool – This tool makes a cell's contents moveable by drag-and-drop methods.

Random tool – Click to give a random value between 0 and 9 to the cell.

Rows - Vertical reference points for the cells in a spreadsheet.

Spin Tool – Adds or subtracts 1 from the value of the cell to its right.

Spreadsheet - A computer program that represents information in a grid of rows and columns. Any cell in the grid may contain either data or a formula that describes the value to be inserted based on the values in other cells.

Timer – When placed in the spreadsheet, click the timer to adds 1 to the value of the cell to its right every second until it is clicked again.

Computing: Year 6 Scratch Programming

Key terms:

1. Scratch
2. Programming
3. Stage
4. Loop
5. Algorithm
6. Variable
7. Sequence
8. Selection
9. Sprite
10. Behaviour

Scratch:

With Scratch, you can program your own interactive stories, games, and animations — and share your creations with others in the online community.

Sprites:

- Animated characters or objects that are separate from the background in a game
- To create a sprite, you can:
 - Use the Sprite Library
 - Create one using the Sprite Editor
 - Import a sprite from a file

Using variables:

- A variable represents a location in memory
- This location is used to hold a value which you assign to it. You can change the value in the program
- You give a variable a name, which you use to refer to it, for example to set an initial value, change, use or output the value
- For example: A variable called "Lives" might hold the value "3"
- Set Lives = 3

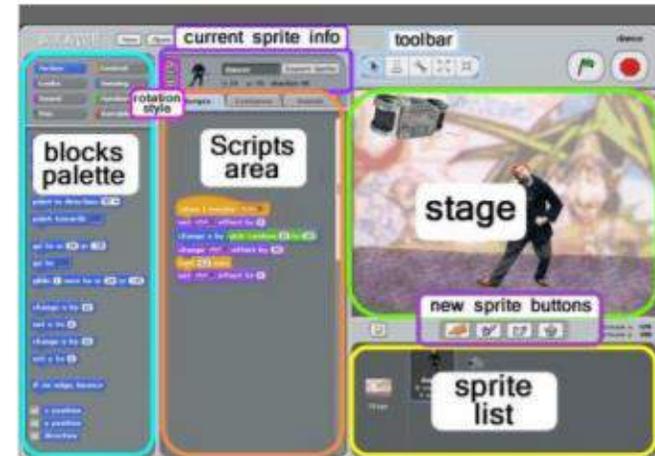

The start of our code

Set the first value of deaths to zero

If the player has touched an enemy then we increase the number of deaths by 1

If the right key is pressed then we move our character to the right (positive on the x axis). If the left key is pressed then we move our character to the left (negative on the x axis).

| Block | Meaning |
|-------|--|
| | This will start our game running. When the green flag is clicked all connected blocks will be run in order |
| | This creates a loop. Code inside is run over and over until the game is quit |
| | This is an if block. It checks whether something is true and if so, the code inside it is run |
| | These blocks allow us to change the value of a variable with the name deaths |
| | This block goes inside an if block and allows us to check if the player has touched an enemy |
| | This block goes inside an if block and allows us to check whether a key has been pressed |
| | This block allows us to move our character right or left (on the x axis) |

Add comments to your code to help explain what each part does

Space bar to shoot.

ShootingOn only 1 if the Stones have been collected first.

Noise played when stone thrown.

Stone travels until it hits the edge of the screen and then disappears.

Using lists in Scratch:

- In Scratch, a List is a special variable type that can contain multiple other variables
- In other programming languages this is usually known as an Array

Computing: Year 6 **We Are Project Managers**

Computing Vision Statement

“We are all different, but we make up one school.”

Our school vision celebrates difference. Our **Computing** curriculum is designed to engage children and give them a wide range of engaging contexts within which to apply their computing skills; this helps them to adapt to the different challenges and opportunities that life in the modern world offers. With regard to e-Safety, this means giving the pupils the tools and the confidence to engage with the wider world through technology in a safe and responsible manner.
