

\*What to do when you see a hedgehog out during the day.\*

Hedgehogs are usually seen during the

night and if you find a hedgehog

out in the day it could be

ill and need rescuing (unless it

is spring when there are

nesting females).

Do's

Don'ts

- Feed it out or dog food.
- Put clean water out for it in a shallow bowl.
- Leave gaps in fences.
- If your starting a bonfire, check it.
- Leave piles of leaves out for it to nest in.

If you find a sick hedgehog put it in a box and contact your local wildlife rescue centre or vets.

- Don't feed it milk, bread or peanuts.
- Don't use garden strimmers without first checking for hedgehogs.
